HOSPITALITY

blupure

All solutions for professionally offering fresh, still or sparkling water. And also juices, syrups...

Blupura, the hospitality specialists.

With superior design, advanced technology and engineering, excellent production, materials, and components, plus world-class ergonomics and functionality, our comprehensive range includes countertop and undercounter solutions. This caters to every performance requirement, ensuring water - and more - is served at the perfect temperature. This is why Blupura is recognized globally as a leading brand in the hospitality sector.

Premium, certified, and made-in-Italy products.

All Blupura water coolers are 100% designed and manufactured in our **Italian plant**. Because creating products of exceptional design and quality requires meticulous monitoring at every production stage. **All Blupura water coolers** meet the highest industry standards, and they are certified for quality, hygiene, and safety by both internationally and nationally recognized associations and certification authorities in numerous countries worldwide.

Greater sustainability for your business.

In addition to efficiency and savings benefits, choosing to give up bottled water in favor of a water cooler connected to the water supply reflects environmental sensitivity: less plastic in the ecosystem, reduced transportation pollution, and significant energy saving. Blupura has long been a sustainability pioneer in the market, using only natural refrigerants with low impact on the Earth's atmosphere.

A tall, stainless steel Blupura water cooler stands in a bar area. The machine has a control panel with several buttons and a digital display. To its right is a wooden crate filled with glass bottles, with the Blupura logo and 'Made in Italy' printed on it. The background shows a stone wall and a bar counter with various bottles.

High-quality water
for hospitality professionals.

Top-quality water
and service.

Connecting a Blupura water cooler to your business' water supply is a smart **choice** for several reasons.

Above all, it ensures that you consistently offer your customers premium **water** as they wish, at the perfect temperature.

This is made possible through Blupura's numerous outstanding filtration options.

More savings,
increased efficiency,
fewer worries.

The pure, chilled, and sparkling water from Blupura water coolers reduces bottled water operational costs by over **80%**, not to mention the time-related savings (ordering bottles, unloading, waste...).

There's also the benefit of saving on establishment management: no bottled water means **more available space** in refrigerators and storage areas.
